16th Annual Sale

• FEBRUARY 17, 2025 •
Billings Livestock Commission
Billings, Montana • 1:00 PM
240 YEARLING BULLS SELL

Building the *Future* with **SCIENCE**

Welcome TO THE 16TH ANNUAL SALE

Welcome to the 2025 Bulls of the Big Sky sale. This is their best set of bulls offered to date and in volume. No matter what you are looking for to fit your program they have it. No matter if you are looking for purebred or SimAngus bulls they have it in volume. Not to mention a great selection of growth, maternal and calving ease bulls. To top it off this sale has one of the largest offerings of red Simmental and SimAngus bulls in the region. Again, no matter what your needs are, I am sure you can find it here. All of the data has been collected, and these bulls have been culled throughout the development process for quality, disposition, structure, and feet. What is in this sale are the bulls that have passed all the tests.

This group of breeders has a unified vision to produce the best product for their customers. Many of these bulls were produced using RightMate technology and all of the bulls have been RightChoice tested to help make your buying decisions easier. Please refer to the RightChoice page in this catalog for more information. If you attended the field day back in January, you learned how you as a commercial producer can make precision breeding decisions by collecting DNA on your cow herd and matching it to bulls in this offering. By using RightBull you can meet your goals more rapidly by using DNA technology. If you are interested in the future talk to one of the Bull of the Big Sky members, one of us on the Allied team.

In 2024 the Bulls of the Big Sky purchased membership in Allied Feeding Partners with the goal of helping their bull customers with feeder calf marketing. They care about your success and this investment further proves their commitment to you, the bull customer. If you have calves to market, please contact us so we can assist you get top dollar for your calves produced by these top notch bulls.

Again we are very excited about this offering and if you have any questions please feel free to contact one of us on the Allied team.

Sincerely,

Marty Ropp, Rocky Forseth, Corey Wilkins and Jared Murnin

ABOUT THE BULLS

Bull Warranty:

Warranty and guarantee of the bulls will be covered by the breeder of the individual bulls. Every bull selling carries a 100% guarantee extended warranty for one breeding season (not to exceed 90 days) provided the bull is managed properly and in acceptable nutritional physical health. In the event a customer has any problem with a bull (health, injury, or death) prior to or during the bulls first breeding season the customer should immediately contact the breeder of the bull to report a claim. A veterinarian's statement of the problem will be required and Bulls of the Big Sky members reserves the right to have the bull returned if deemed necessary. A replacement bull of mutually agreed upon quality will be provided if Bulls of the Big Sky has one available. In the event a satisfactory replacement is not available, the customer will be given a full credit (minus salvage value) to be used in a future Bulls of the Big Sky sale. Bulls of the Big Sky members will not be held responsible under any circumstances for any settlement amount exceeding the purchase price of bull. NO one can guarantee that every animal will perform perfectly, but the Bulls of the Big Sky group will try to make things right if they do not.

Announcements:

Announcements made from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders and sale force will not be held responsible for any personal injury for attending this sale.

Volume Buyer Discount:

Buyers purchasing 5 or more bulls will receive a 5% rebate on their total purchase following delivery and before June 1.

Notice to Out of State Buyers:

Please know your state health requirements prior to sale day. If your state requires Trich testing on 12 months or younger, the bull(s) will not be able to leave Montana immediately after the sale and must return to Veltkamp's for testing. Though Bulls of the Big Sky pays for the cost of all regular health papers, the cost of Trich testing and other state specific health requirements will be the responsibility of the Buyer and will be billed to the Buyer.

Notice to Canadian Buyers:

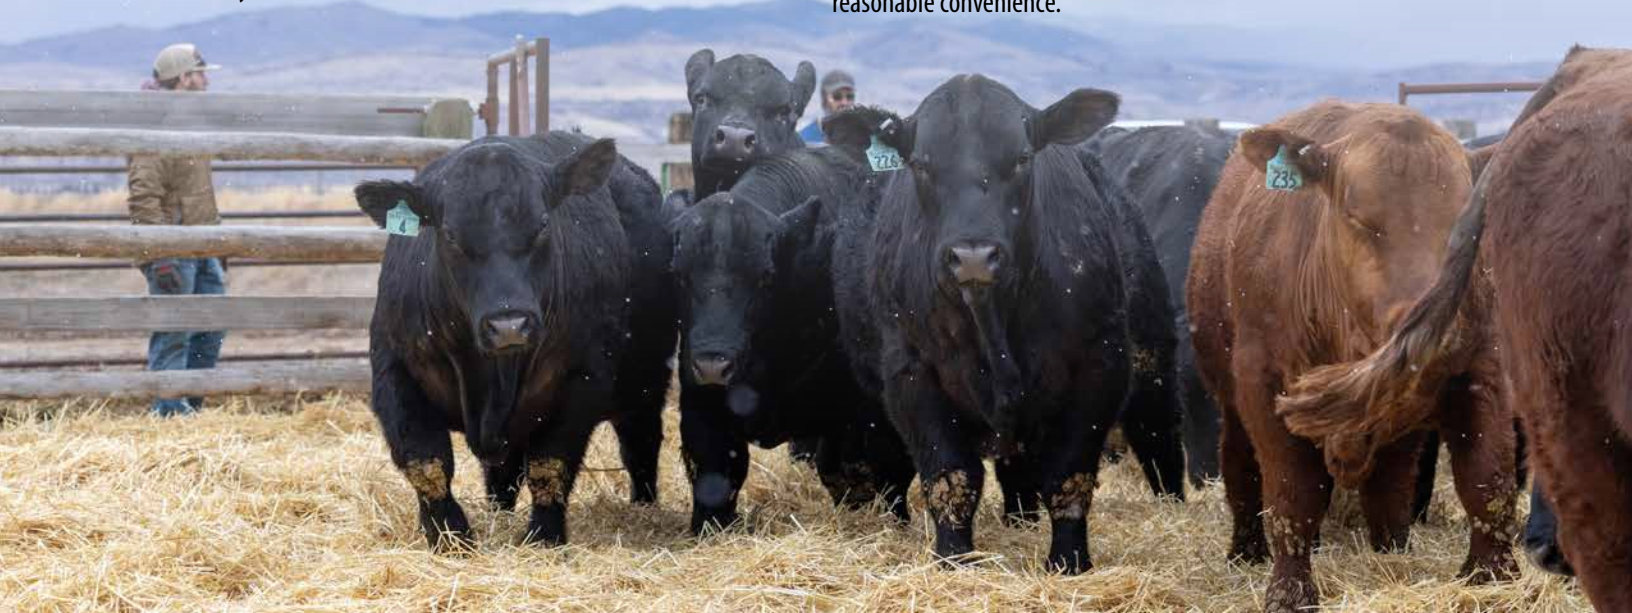

Bulls of the Big Sky will provide free delivery to the US side of Port of Entry at Sweetgrass, MT and pay for the cost of regular health papers. The Buyer is responsible for the cost of additional Canadian or Provincial Health Requirements.

Feeding and Delivery:

Bulls will be fed free of charge back at Veltkamp's Bull Development Facility in Manhattan, MT until April 1. During that time, we will semen test and give your bulls a Breeding Soundness Exam. If a buyer wishes to keep their bull at Veltkamp's after April 1st, feed beyond April 1st and freight will be left to the buyer. We begin delivering bulls by the last week of March and early April. If you have special delivery requests, please let us know at the time of the sale. Feed charges will be \$4.50 per head per day for those that request their bulls remain at Veltkamp's after our delivery time. Bulls taken by the buyer immediately after the sale will receive a \$150 discount, but we remind you that we will not have had the opportunity to semen test bulls taken by a buyer immediately after the sale, and we recommend that the buyers arrange for semen testing at their ranch prior to turnout. For purchased bulls traveling beyond 500 miles, the most economical trucking available will be arranged.

Retaining Semen Interest:

The bull buyer will receive full possession, 100% salvage value, and $\frac{3}{4}$ semen interest of any bull purchased in this sale, while the individual selling ranch ("Seller") will retain $\frac{1}{4}$ semen interest in any bull that it sells. Seller's retained semen interest is a royalty interest that entitles Seller to $\frac{1}{4}$ of any revenue from the sale of that bull's semen. Seller's retained semen interest shall remain even if the bull, or any interest in the bull, is later sold to a third-party; and, the Buyer shall be solely responsible for notifying any later third-party buyer of the Seller's retained semen interest and for ensuring that Seller's retained semen interest is satisfied if semen is ever sold. Seller will not be responsible for any expenses directly or indirectly related to semen collection or promotion of a purchased bull, unless the Buyer and Seller agree otherwise in writing prior to semen collection. Seller's retained semen interest also includes the right of Seller to collect semen on the purchased bull at Seller's sole expense and at the Buyer's reasonable convenience.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

LBRS MILWAUKEE M35 Sells as Lot 3.

Here's a tremendous set of Genesis flush brothers out of PLR Sapphire and full sibs to LBRS Logan who was the sale highlight and high seller in the 2024 Bulls of the Big Sky Sale. Magnitude himself is impressive with extra length power and mass. He boasts exceptional growth from birth to weaning with a adjusted WW of 840.

Milestone is the moderate framed bull of the flush, but still packs a punch with tremendous rib shape, thickness and style. There's a lot of maternal merit here in combination with exceptional carcass values. Sapphire herself is moderate framed and always out produces herself. We have several females in production out of her and they all have risen to the top and are our very best cows.

Milwaukee is a standout with a great look, tremendous structural integrity and foot quality. A bull that can move your program forward in every direction. Phenotype, maternal, and carcass excellence, he does it all.

G+

Possibly one of the most intriguing Genesis sons we've raised. Flawless phenotype from end to end with an exciting herd bull look. Genetically, he shows tremendous balance with 10 EPDS in the top 25% and 7 of those in the top 10%. His LRS Iconic dam is a calving ease specialist with excellent feet and udder quality. He will be a highlight on sale day.

M273 is easy to find when you enter the pen. A solid black Stone Cold with a ton of rib and dimension. His dam is a direct daughter of the Sapphire donor and she herself has rated 105 for Weaning Weight and 109 for Yearling Weight on four calves. He reads with great calving ease, good growth and exceptional maternal values.

G+

Solid black Stone Cold out of a first calf heifer. A bull with a little more frame his stats show a tremendous spread from birth to weaning with a 62 pound birth weight and an actual Weaning Weight of 820 pounds. Balanced genetics here with 12 EPDS ranking in the top 30% or higher. He also came back with a 5 G+ on Right Choice.

If your looking to add growth this tremendous Essential son will do the trick. He boasts top 1% EPD rankings for WW, YW, ADG and had the top ratio for WW at LBRS at 111. Long, deep, massive and athletic in his movement, he has been a favorite since birth. His dam is the second Sapphire daughter to produce an exceptional bull for this sale. This bloodline is just flat getting it done here at LBRS.

Stylish and attractive from every angle this Fireman son is one to take note of. We didn't get too many Firemans but we sure wish we had more. Eclipse has been making great cows and his dam did a excellent job as a first calf heifer. His actual data shows a 63 pound birthweight and an 800 pound Weaning Weight. Great combination of growth and maternal and a bull that should be on everyone's shortlist.

LBRS MIDNIGHT MAGIC M220 Sells as Lot 11.

LBRS MAGNITUDE M71 Sells as Lot 12.

G+

A powerful, deep ribbed Fireman that has exploded since going on test. This has been the expectation with M71 progeny, a cow who's individual ratios show 113 for WW and 116 for YW. Great genetic merit here as well with a 5 G+ Right Choice score and a top 3% stay number for longevity.

LBRS MERIT M61 Sells as Lot 13.

G+

A wide based athletic Honor son with a ton of horsepower. His dam has been steady and consistently ratios above average for BW, 102 for YW and 107 for YW on 7 calves. Balanced genetics here with a 5 G+ Right Choice score. A bull that would be suited to a little more room as he can get a little nervous if you get him a small area by himself.

G+

ATM

The only Dianna son we have this year. He's a little younger calf that was managed different than the rest of our group. I would expect his true performance to match closer to his EPD profile with tremendous growth potential and added carcass values. We recently sold Dianna to Fauth Ranch and AOK Simmental and we greatly look forward to what is in store for them in the future.

The Innovates typically come small and then take off and grow well. This terminal minded Innovate son follows with that pattern. Calving ease, growth and added carcass merit will be his strong suit. Becca has taken two full brothers as 4-H steers and received Grand Champion one year and 3rd place ranking the next. Sarah's Innovate steer also took Grand Champion this year. Innovate delivers growth with pleasing phenotype in all his calves.

Look at this guy to add pounds to your calves. He weaned off at 780 lbs.

ASA Quick Reference to EPDs, Indexes and \$Values

EXPECTED PROGENY DIFFERENCES (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

- ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.
- BACK FAT (BF): Inches of carcass backfat at 475 days.
- BIRTH WEIGHT (BW): Pounds of birth weight.
- CALVING EASE (CE): Percent of unassisted births when used on heifers.
- CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.
- DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).
- MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.
- MILK (MLK): Pounds of weaning weight due to milk.
- MARBLING (MARB): Carcass marbling score at 475 days.
- MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.
- RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.
- TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.
- WEANING WEIGHT (WW): Pounds of weaning weight.
- YEARLING WEIGHT (YW): Pounds of yearling weight.
- YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

- ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org

Lots 184-188 are out of our herd sire CLRS Kosher who has been an exciting Genesis son that provides lots of CE so he was used on heifers for the last 2 years. 788M is a blaze face that offers plenty of CE. Well made out of a super cow. She raised both twins weaning off over 1200 pounds. She has a WW ratio of 103 and YW of 101.

DMS ICONIC ENCORE L85M Sells as Lot 226.

G64M is a Genesis son worth the look, perhaps not from just a performance view but from a very productive dam standpoint. 064Y has been an exceptional cow with 13 calves and a 361 day Cl. 14 is right around the corner and still has a great udder and maintains her flesh and soundness.

G62M is another game changer for performance. He himself weaned off over 800 lbs. and ranks in the top 2 and 3% for growth EPDs. He has some bone and size to get the job done. He comes from a productive cow that has a 104 WW and 103 YW ratio. She also had a stellar bull scan at 169 IMF ratio.

L85M is simply impressive. Thick, deep and super powerful. This is his dam's first bull but she still has a WW ratio of 109 and YW 107 and a Cl of 349. His 855 WW should also grab your attention!

Lots 246-256 are the debut set of Mr. Moab. Definitely a bull that will add the power and growth phenotypically and genetically with the EPDs. This has been an exciting set of calves to watch and the heifer calves were stunning. The entire set is heavy muscled and number changes. B65M is a great example of the Moab's growth and power. Actual WW was 920 lbs. Comes with a top 10% TI.
